

Magic Mirror

The Lost Suits

Magic Mirror

Project Pitch - Max 1000 signs including spaces.
Stick to the basics (what, who, where, and how) i.e.
interactions. Be specific in your choice of words.

You play as the Joker from the French deck.

You accidentally broke a magic mirror that shows the world of all playing cards. You soon learn that this mirror held the history of all cards.

Your mission is to explore this broken world. Each piece of the mirror is a doorway to a different world, showing a card deck from a different time and place.

You will start in the world you know with Hearts, Spades, Diamonds, and Clubs. From there, you will travel back in time to find where playing cards began. You must travel through these amazing new worlds: from the story-filled worlds of «Cups» and «Swords» in old Italian and Spanish decks, to the living forests of «Acorns» and «Leaves» in German decks, and even older cards.

Your final goal is to collect all these «suit pieces» from different places, use them to mend the magic mirror's cracks, and put the long history of playing cards back together..

Option a. Project key visual portrait

Option b. Project key visual portrait

The Interface - Key visuals

Key visuals of the interface content

User Journey

User journey showing the key interaction.

Think from start to finish, show the whole experience.

Beetroot water spinach okra water chestnut ricebean

Scenography

Make a visual, sketch or high quality photo showing all elements of your installation in perspective.

Spatial diagram

Make a sketch (hand sketch or vector drawing) of the top view of your scenography in the correct scale (1:20) including a schematic visitor. This means a bird's sight of your installation, with information about the material used. Add the overall dimensions (in mm) of the space and captions naming the components.
